PROFESSIONAL EXPERIENCE

Innovation Club - Volunteer
Kkr And Ksr Institute Of Technology And Sciences • 08/2023 - Current
Being an enthusiastic participant of the Innovation Club, I am deeply involved in the process of brainstorming and crafting innovative solutions for practical problems. My love for technology and knack for problem-solving motivate me to work closely with other club members on initiatives aimed at enhancing sustainability and enhancing the quality of community life. I excel in environments that are constantly changing, where I can share my ideas, gain insights from peers, and use creative thinking to bring about positive change.

LEARNING NEW TECHNOLOGY

In my journey, I have delved into a wide range of technologies. These include HTML, CSS, JavaScript, and React for crafting captivating front-end experiences. On the backend front, I am well-versed in Node.js, Express, and MongoDB to build robust solutions. My expertise also extends to UI/UX design to ensure that every project is user-centric. Moreover, I possess a foundational knowledge of cybersecurity best practices through hands-on experience with Kali Linux. Familiarity with content management systems such as WordPress and Webflow is also part of my skill set. When it comes to programming languages, I am skilled in Python,
